### **TierPoint Marks OHA Completion With Open House**

The TierPoint Valley Forge renovation project included two parts.

The TierPoint Valley Forge Lower Level included disaster recovery spaces, restrooms and main corridor areas. All areas were in dire need of a fresh and modern appearance to attract clients and provide a comfortable and bright work environment. TierPoint was excited for the new refreshing space.

Part two included TierPoint V2D10 Data Center and Cafe space.

After completing design in late 2018, the construction for the V2D10 data center commenced in mid- January immediately following the completion of the Lower Level Disaster Recovery spaces. We were given the aggressive date of May 17th for completion, which with the collaboration of our OHA team we achieved. The project progressed well with demolition of the exterior window systems and installation of prefabricated paneling systems being installed to eliminate the remaining catwalk and creating additional interior square footage and a more uniform look for the Valley Forge site. The remaining work included Allucabond panels outside, a data center with intricate mechanical and electrical systems, raised flooring and additional offices for both clients and TierPoint. Through hard work and perseverance, our project team will once again complete a TierPoint project on time.

The new Cafe space create an open spacious area for TierPoint and client staff to meet and enjoy a meal, TV and some down time. Modern, bright amenities made the cafe an inviting space.

The renovations were celebrated with an Open House that included a ribbon cutting, cookout, beverages, music and a fun time by all. TierPoint executives were extremely pleased by the services of OHA pointing out the quality, speed of delivery of the finished spaces and beating their budget. OHA thanks all of team partners on the project.

## **STAFF SPOTLIGHT**

## Mandy MacLean - Office Manager

Mandy has been a critical team member of Onda-Huyett Associates for nearly 20 years. Most of our clients, vendors and construction partners have never met Mandy- so now's your chance.

Since joining Onda-Huyett Mandy's list of responsibilities has grown to include Human Resource, Information Technology, Social Media marketing, Safety Committee liaison and more. She assists in coordinating Onda-Huyett's community service projects, employee events and staff training. Mandy is a member of Onda-Huyett's Business Council.

Mandy is also the person who keeps our OHA team looking so sharp and easily identified in their OHA logo attire.

Mandy lives in Schuylkill County with her husband and daughter.

**Onda-Huyett Associates continues to provide high quality, professional staffing to meet the needs of our clients.**
